Financial Management

Flexible & easy to use
Care Management

Complete HR & Rota
Management with time clocks

**Best practice business software
for care organisations**

"We listened to what our customers wanted and acted on what they said. Good things happen when you pay attention."

"We needed a system that was easy to use, had full functionality and the ability to provide a sophisticated level of management reporting. CareSys is all of these and an added bonus is our managers love it, as do our finance teams"

"CareSys has been used as the sole application for our entire income management since 1996. Throughout our aggressive growth, CareSys has coped with the increased demands, and is now used as the primary business information system at our homes for clients and staff, and provides day-to-day financial information to help us manage the business"

"We have successfully worked with CareSys from day one in implementing a robust IT platform that encompasses all operational software, hardware and communication requirements. The CareSys application now provides our managers with accurate and timely information as well as the framework for implementing strong financial control"

"CareSys handles over 80% of our billing and is therefore a key operational service within the business continuity plan. Its simplicity of recovery was considered a marked success during our disaster simulation"
